

STEP 01

SUBMISSION

Company submits a comprehensive substance dossier for review, ensuring full transparency of all ingredients, including flavors and fragrances.

STEP 02

SCREENING [Ⓢ]

Dossier is screened against the MADE Banned List for 15K+ prohibited substances.

Note: Some substances may trigger additional documentation requirements based on known risks.

 **MADE Banned List**

STEP 03

RESULTS

Screening results are distilled in a comprehensive report issued for MADE WISE Certification.

 **PRODUCT CERTIFIED [Ⓢ]**

↓
 **ACTION REQUIRED**

TRANSFORMATION [Ⓢ]

Expert guidance to refine and elevate products, resolving any challenges identified in the MADE Banned List review.

* The following **steps 4-6** apply to companies electing to pursue **MADE SAFE** Certification

STEP 04

REVIEW

Substance-specific and use-case review for products advancing to MADE SAFE Certification testing.

STEP 05

SCREENING [Ⓢ]

Product is screened against the Ecosystem Approach Screen.

-  **BIOACCUMULATION**
Accumulation in animals or people
-  **ENVIRONMENTAL PERSISTENCE**
Resistance to biodegradation
-  **HUMAN TOXICITY**
Harmful effects on humans
-  **AQUATIC TOXICITY**
Harmful effects on aquatic life
-  **TERRESTRIAL TOXICITY**
Harmful effects on terrestrial life
-  **CONTAMINATION**
To further push supply chain and mfg transparency, contamination risks are considered; improvements are suggested where known

STEP 06

RESULTS

Screening results are distilled in a comprehensive report issued for MADE SAFE Certification.

 **PRODUCT CERTIFIED [Ⓢ]**

↓
 **ACTION REQUIRED**

TRANSFORMATION [Ⓢ]

Expert guidance to refine and elevate products, resolving any challenges identified in the MADE Banned List review.
